

Brite-Strike® professional tactical lights and lighting solutions have always been Tactical By Design®. Our products are all designed by police officers, operators and soldiers for ease of operation in real world conditions. We have always been considered the most innovative tactical lighting company with multiple patents both in the US and Internationally on our products.

NTOA, National Tactical Officers Association, is a non-profit association dedicated to keeping you informed, well trained and ready to handle the challenges you face as a law enforcement professional.

The National Rifle Association is America's longest-standing civil rights organization. We're proud defenders of history's patriots and diligent protectors of the Second Amendment.

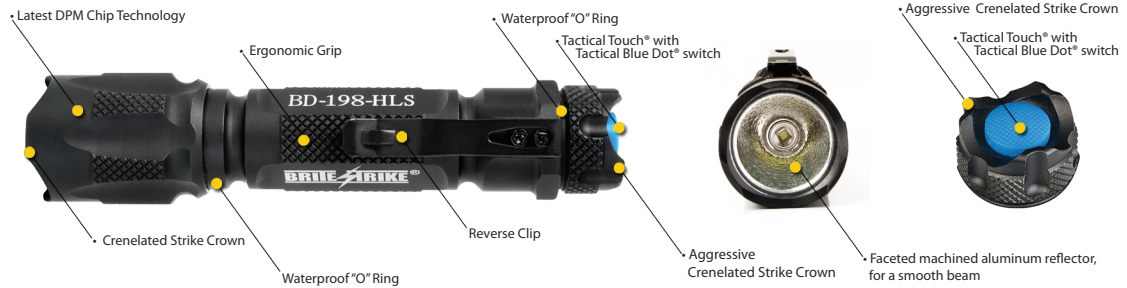

Brite-Strike® Professional Tactical Lights and Lighting Solutions.

Tactical Touch® Flashlights with Tactical Blue Dot® Switches

Tactical Touch®

All of our lights can be turned on and all modes accessed using a single finger or thumb on one hand, thus meeting our definition of a true "Tactical Flashlight". We simply never understood how a switch that requires two-handed twisting and turning action to turn on or off or to access any functions made sense. Accidental turn-ons are prevented by slightly recessing the switch within the rear crenelated crown. Our patented design not only protects the switch from damage but is very effective when applying pressure point techniques.

Bezel is polished stainless steel and brass
Highly polished steel reflector
Waterproof
Hi/Lo/Strobe Tactical Touch® Switch
Batteries: Two AAA Alkaline (included)
Gift Box: Included

45L055*

EPLI*

EPLI™ Executive Precision Lighting Instrument*

The EPLI™ uses the latest Cree LED with state of the art, digital power management to deliver maximum power and run time out of two AAA batteries. The EPLI™ has a special highly polished steel reflector that is much more narrow and deep than our other lights. The design produces a brilliant, 160 lumen* color tuned beam that closely approximates natural daylight. The low setting at 80 lumens is perfect for reading a menu in a dark restaurant and the third setting is a dazzling 160 lumen* strobe which can distract and disorient an attacker. Length: 5.125 inches.

* Due to the use of Alkaline batteries the maximum output of 160 lumens will be for 10 minutes and then begin to drop off. This is to prevent excessive heat build-up and any possibility of damaging the light or batteries.

- Water and Shock Resistant
- Hi/Lo/Strobe Tactical Touch® Switch
- Batteries: Rechargeable Lithium (included)
- Audio may be deactivated
- Length: 7.5 inches

FLEXATON®

Flexaton® BIL™ (Baton Integrated Light™) expandable baton from Brite-Strike® utilizes a revolutionary semi-rigid nylon body made 100% in the USA. This baton can deliver effective nerve and muscular shock in a baton strike but with the benefit that it is less likely to deliver lethal strikes against you if taken away.

Short Description

EXPANDABLE UP TO 24"

Semi-Rigid Nylon Body

20LK25

SB170HLS

Flexaton® BIL™ (Baton Integrated Light™)

When used as a duty flashlight with an aggressive subject, the officer can use the 270 lumen High or Strobe settings to distract and disorient the subject. The Flexaton® BIL™ (Baton Integrated Light™) can be immediately snapped out so the expandable baton can be used to defend or ward off a blow from the subject. If an escalation of force is required, the Flexaton® BIL™ can be used to deliver an effective strike. By not having to drop your flashlight and reach for your baton, you gain precious seconds while the attacker is disoriented from the highly effective strobe.

APALS®

APALS®, All Purpose Adhesive Light Strips are considered the next generation replacement for chemical light sticks. They were designed by military operators searching for a low cost, ultra reliable, long lasting combat identifier. The hermetically sealed APALS® light strips are intended for use in the worst possible conditions, from the searing heat of the desert to the frigid waters of the harshest seas. About the size of a band-aid and as thick as a credit card, APALS® light strips have a heavy-duty Mil Spec 3M® adhesive back that holds tight to any surface wet or dry. The ultra-visible APALS® light strips will go anywhere you go. The 10 Pack comes with a convenient flex-pack storage case inside the box. The insert keeps the APALS® light strips from accidentally activating. The APALS® light strips can be used over and over. Just peel off the adhesive backing and stick where you need it most.

APALS-AIR®

APALS-AIR®, All Purpose Adhesive Light Strips with Active Illumination Reflective™ Technology, contains the same technology as our APALS® light strips. The only differences being the APALS-AIR® is a micro-thin LED light strip that slips into a specially designed reflective pocket that allows the light from the LED to be enhanced. You can permanently mount the reflective pocket and change the LED light strip as needed. Also, the APALS-AIR® is not hermetically sealed which makes it weather resistant.

3M® is a registered trademark of 3M® Corporation.

CAPSS3™

Great for camping! It can alert you if a potentially dangerous intruder has entered your perimeter.

- 135 dB Alarm Module with built in red LED flashlight and side blue LEDs for signaling.

45L054 CAPSS3 Camp Alert Perimeter Security System And Survival Signaling System

The Camp Alert Perimeter Security System and Survival Signaling System is a complete survival emergency system for hunters, campers, hikers and fishermen. It works as a perimeter security system that will alert you if anyone or an animal wanders into your camp ground. The alarm module can be used as an audible emergency device to let passers-by know you need help. The alarm module has bright flashing blue LEDs that can be used as a signaling device at night. It also has a red LED flashlight built in for map reading that will not destroy your night vision. The CAPSS3™ kit comes with two Blue APALS® (All Purpose Adhesive Light Strips). The APALS® light strips have a polished aluminum front that can be used as a small signaling mirror in the daytime.

20LK47 LSREB60HLS Lightning Strike® 3 in 1 Personal Safety System

The Lightning Strike® Personal Protection System is designed specifically to reduce the incidents of assaults and overall violence against women. It is designed as not just a product, but an overall personal protection program for women to utilize on college campuses, while jogging, walking, or even just strolling to their car in a dark parking lot. The system includes the only tactical flashlight specifically designed as a personal safety product for women, as well as a personal alarm that emits a 120 decibel shrieking alarm when activated. The Lightning-Strike® Personal Protection System makes a unique gift for a loved one. It comes with a breakaway safety lanyard, an attractive leather quick deployment holster, and tough coiled polymer lanyard.
