

Technology with Vision

2016 HELLA ACCESSORY GUIDE

TECHNOLOGY WITH VISION

HELLA develops and manufactures lighting technology and electronic components for the automotive industry and also has one of the largest retail organizations for automotive parts, accessories, diagnostics, and services within Europe. Complete vehicle modules, air-conditioning systems, and vehicle electrical systems are also produced in joint venture companies. With more than 6,000 people working in research and development, HELLA is one of the most important innovation drivers in the market.

HELLA GROUP

The HELLA KGaA Hueck & Co. is a global, family-controlled company with more than 30,700 employees at 100 locations and in more than 35 countries. HELLA develops and produces electronic components and lighting for the automotive market.

HELLA, Inc. is the HELLA sales and distribution company serving North and South America. We are a world-class supplier to the automotive aftermarket, marine, and heavy-duty accounts. HELLA, Inc. is also the primary marketing arm of HELLA and Behr Hella Service in North and South America. Marketing activities include print media, online support, trade shows, and motorsports activities. With experience as an original equipment supplier and knowledge in the European aftermarket, for over 25 years HELLA, Inc. has been offering German engineering with pride to North and South America.

LOCATIONS

THE BEST LIGHTING FOR ANY CONDITION

HELLA develops almost indestructible products, such as the Rallye 4000 LED series and LED lightbar specifically for the off-road market. Quality, power and better lighting performance, along with a wide range of products, are already part of the HELLA tradition.

GET MORE FROM HELLA ONLINE

www.myhellalights.com the new website oriented towards the end consumer features LED, Xenon and Halogen auxiliary lamps, daytime running lights, accessories, and bulbs with tons of information and downloads. LIGHTING
AUXILIARY LIGHTS

KNOWLEDGE OF LIGHT AND POWER

Innovations from HELLA. With HELLA, you opt for products with uncompromising quality. We work every day to make our lighting solutions even better and safer. As a result of our relentless innovative energy, we are among the first, best and even the sole suppliers or manufacturers in many areas of vehicle and lighting technology. We are currently pleased to be playing a particularly strong pioneering role with our Rallye LED using 100% LED technology.

Research and development. As in the field of stress testing where we test our products on the durability of the material and light source, HELLA headlights undergo continuous quality and performance tests for light distribution and radiation intensity. They are granted approval under the type approval requirements of the EU approval process. Different tasks require different headlights. The result is headlights of the highest quality – perfectly matched to the most diverse requirements under extreme conditions.

RADIATION INTENSITY

LIGHT DISTRIBUTION SHOULD BE CONSIDERED OBJECTIVELY.

Different applications require different auxiliary lights. The Isolux diagrams show a comparison of light distributions. The red-orange colouring marks the area with high illumination intensity. From yellow through green to blue, the illumination intensity decreases depending on distance. Fog light radiation is wide but not over a long distance (to avoid, as far as possible, reflection through fog droplets).

THE LUX UNIT

As a unit of illuminance, Lux defines the luminous flux from a light source that hits a specified surface. For example, an office should be illuminated with at least 500 Lux and with just 1 Lux the human eye

can read a newspaper without any problem. The values along the Lux bar show where the respective illuminance is achieved in the light distribution diagrams.

THE HIGH-BOOST REFLECTOR

High-boost reflectors are specially developed by HELLA to provide maximum light output. Compared to standard commercial auxiliary lights of similar size, HELLA auxiliary lights with high-boost reflectors deliver a much higher degree of efficiency with improved light output.

THE "REF." REFERENCE NUMBER

The reference number is a value applicable to spotlights. According to the ECE Regulation in effect since 2009, the sum of the reference numbers of all the insta-

lled headlights must not exceed the upper limit of 100 per vehicle. The two values of the standard high beam (left and right main headlights) plus the values of any other extra spotlights are added together. The reference number of HELLA spotlights as well as the E-type approval mark can be found in the catalog for each model. A high beam with a 17.5 reference number emits a wide and full beam, but not as much as a high beam with a 37.5 reference number. A high beam Ref. 37.5 is therefore ideal for long, straight distances, while a high beam Ref. 17.5 can illuminate curved routes (especially mountainous areas) better.

Note: In some countries, a maximum high beam power of only 75 (reference value)

may be connected. In those countries, the high beam integrated into the vehicle must be inoperative when using the Ref. 37.5 high beam; however, the Ref. 17.5 high beam can generally be connected in addition.

CELIS® light guides

With CELIS® technology (Central Lighting Systems), fibreglass cables or thin plastic rods transport the light from a central light source to where it is required.

ECE & SAE APPROVALS

ECE Approval: The World Forum of Vehicle Regulations is a working party of the United Nations Economic Commission of Europe (ECE). It is tasked with creating a uniform set of regulations for vehicles, which makes them legal on the streets of participating countries.

SAE Approval: The USA has its own set of standards, which are called the Federal Motor Vehicle Safety Standards (FMVSS), which are based on proposals of the Society of Automotive Engineers (SAE). The USA does not recognize ECE approvals. Canada has its own Canada Motor Vehicle Safety Standards (CMVSS), broadly similar to FMVSS, but Canada does also accept ECE-compliant headlamps

AUXILIARY LIGHTING

Illumination and Isolux diagrams

Using Isolux diagrams, we can illustrate and compare light distributions. The red-orange colour indicates the area of high intensity illumination; the illuminance falls from yellow to green to blue depending on the distance from the light source.

Rallye 4000 LED with Ref. 40

Rallye 40000i Xenon with Ref. 37.5

Rallye 4000X Halogen with Ref. 17.5

2.1 Auxiliary Lights

LED LIGHT BAR 350

LED

NEW

Upright or pendant installation.

Lateral support
easy adjustment

The brackets can be installed facing forward or backward.

Features:

- LED compact light bar
- 16" (408mm) long, low profile, and lightweight at only 1.7 pounds (790 g)
- Developed for the special requirements of offroad vehicles and for aerodynamic installation on the roofs of truck cabins
- With 12 intensely bright high-power LEDs
- The rear of the housing is an innovative ribbed design
- Effective heat dissipation from the LED electronics through the housing made of thermoconductive plastic.
- Suitable for horizontal mounting
- Stainless steel mounting brackets allow flexible positioning on the vehicle
- Connection: Wire leads
- Double mounting bracket available (sold separately)
- 1500 Lumens for Driving and Pencil Beam versions
- 2200 Lumens for Wide and Narrow Beam versions (on 'High' setting)
- Two intensity light settings for Wide and Narrow Beam versions (220 Lumens on "Low" setting)
- 12 V / 25 W, 24 V / 25 W (Multivolt)
- Fully sealed and submersible

Mounting:

- Horizontal mounting
- Pendant mounting

Applications:

- Long range
- Off road use (Driving and Pencil beam versions ECE approved)
- Trucks / SUVs / ATVs / UTVs / Off-road vehicles

2. Lighting

2.1 LED Auxiliary Lights

RALLYE 4000 LED

LED

Features:

- Three High performance LED's
- Low power consumption
- Very high lifespan - no bulb change necessary
- 1500 lumens (measured)
- Homogenous and ideal illumination due to computer optimized fine tuning of LED light sources and free-form reflector
- Reduces driver fatigue due to the color temperature being close to daylight
- Special blue retaining ring to indicate LED technology
- Multivolt 9 - 32 V DC
- Power Consumption: 30/1W
- 6000°K Color Temperature
- Connection: Wire leads
- Comes with white stone shield
- Sold individually

Mounting:

- Upright mounting
- Pendant mounting

Applications:

- Long range
- Off-road use only

Part Number

Rallye 4000 LED Driving Light w/Position Light

011002101

**RALLYE 4000
COMPACT LED**

LED

Features:

- 2 High Performance LEDs
- UV-resistant polycarbonate lens
- Sturdy, high-quality full-metal housing
- Double reflector for an even beam pattern
- Low Power Consumption
- Passive heat dissipation of the LED electronics with cooling ribs
- Very high lifespan - no bulb change necessary
- Reduces driver fatigue
- Compact size
- Adjustable aluminum bracket
- 1500 lumens (measured)
- 6000°K Color Temperature
- Connection : Wire Leads
- Sold Individually
- Comes with White Stone Shield
- Multivolt 9-32 VDC
- 11W

Mounting:

- Upright mounting
- Pendant mounting

Applications:

- Off-road use only

Includes:

- 1 Lamp
- 1 Stone Shield
- Mounting Instructions

RALLYE 4000 X LED

LED

Features:

- 2 High Performance LEDs
- Sturdy, high-quality aluminum housing
- Double reflector for an even beam pattern
- Dust and waterproof
- Low Power Consumption
- Passive heat dissipation of the LED electronics with cooling ribs
- Very high lifespan - no bulb change necessary
- Reduces driver fatigue
- Compact size
- Die-cast aluminum bracket
- 760 lumens (measured)
- 6000°K Color Temperature
- Connection : Wire Leads
- Sold Individually
- Comes with Black Stone Shield
- Multivolt 10-32 VDC
- 40W

Mounting:

- Upright mounting
- Pendant mounting

Applications:

- Off-road use only

Includes:

- 1 Lamp
- 1 Stone shield
- Mounting Instructions

Part Number
012206021

2.1 LED Auxiliary Lights

FF300 LED

LED

Features:

- 10 High Performance LEDs
- Die cast aluminum housing
- 2,000 lumens (measured)
- 5700° K light temperature
- Compact size
- Sold Individually
- Connection: DT connector
- Multivolt 9-33V DC
- 28W

Mounting

- Upright

Applications

- Off-road use only

Includes

- 1 Light

Part Number

H15176401

MICRO FF LED

LED

Features:

- 6 High Performance LEDs
- Stainless steel bracket
- 1300 lumens (measured)
- Aluminum die cast housing
- 6500° K light temperature
- Connection: DT connector
- Sold Individually
- Multivolt 9-33V DC
- 18W

Mounting

- Upright
- Pendant

Applications

- Off-road use only

Includes

- 1 Light
- DT pigtail
- Mounting instructions

Part Number

H15176301

MICRO 70 LED

LED

Features:

- 4 High Performance LEDs
- Die cast aluminum housing
- 850 lm (measured)
- Glass lens
- 6500° K light temperature
- Connection: Harness (comes with kit)
- Sold as kit
- Multivolt 9-33V DC
- 15W

Mounting

- Upright

Applications

- Off-road use only

Includes

- 2 Lights
- 1 Wire Harness
- 1 Relay
- 1 Switch
- Mounting Hardware
- Mounting Instructions

Part Number

H15176201

2.1 Daytime Running Lights

LEDAY LINE 15° & 30° DAYTIME RUNNING LIGHTS

LED

Features:

- High performance LEDs
- Angled to suit curved bumper profile
- Resistant to harsh UV rays
- Low power consumption
- Easy-Fit Installation
- 8 LEDs per Side
- Power Consumption: <2W per Lamp
- Housing Material: Plastic
- Lens Material: High Impact Acrylic
- Connection: Wire Leads
- SAE / ECE approved

Mounting

- Flush

Applications

- Safety in traffic
- High visibility for other drivers
- Universal application

Includes

- 2 Lamps
- 2 Mounting Brackets
- 1 Changeover Relay
- Universal Mounting Hardware
- Mounting Instructions

Part Number

980850801 - 30°

980860801 - 15°

3 LED DAYTIME RUNNING LIGHTS

LED

Features:

- Three high performance LEDs
- Attractive, clear-glass design
- Stable aluminum housing
- Trouble-free installation through diverse installation options
- SAE / ECE approved

Mounting

- Upright
- Pendant

Applications

- Safety in traffic
- High visibility for other drivers
- Universal application

Includes

- 2 Lights with Brackets
- 1 Control Unit with Wiring Harness
- Mounting Hardware
- Mounting Instructions

LEDAY FLEX II DAYTIME RUNNING LIGHTS

LED

Features:

- LED daytime running lights set
- Kit can be configured into the fascia of the vehicle
- The individual modules are rectangular and each is approximately 0.7" H x 1.6" W (19mm x 42mm) in size
- Each individual module contains two high-power LEDs with light distribution created by the use of an integrated optical system

Mounting

- Flush

Applications

- Universal applications

Includes

- 2 Module Chains
- 1 Changeover relay for control purposes
- Wiring Harness
- Bracket to screw down modules from above
- Universal Mounting Hardware
- Mounting Instructions

Part Number

980789851 - 5 LED Kit

980789861 - 6 LED Kit

LIGHT MEANS VISIBILITY, EVEN DURING THE DAY

HELLA daytime running lights are the ideal solution for anyone who doesn't want to compromise. For drivers who demand a high level of safety and have a keen sense of individual style.

2. Lighting

2.2 90 mm LED Modules

90 MM LED MODULES

The new L4060 LED series is the new addition to the range of 90 millimeter LED modules. This makes HELLA the only supplier in the market to provide a replacement concept for all 90 millimeter halogen modules using LED technology. The design of the new module is very compact and allows three light functions in one module without additional electronics. The resistant cover plate of polycarbonate and the cast aluminum housing are extremely robust and can withstand even tougher loads. The new L4060 LED series give you more illumination and safety with innovative LED technology.

90 MM CONFIGURATOR

This tool shows you the options for equipping or upgrading a vehicle with 90 mm LED modules. See images from Europe's biggest light testing facility and compare the light distribution of halogen and LED modules, in order to help you make the right choice for your application.

2.3 Xenon Auxiliary Lights

RALLYE 4000i XENON

XENON

- Features:**
- Internal ballast
 - Black powder-coated metal housing
 - Optics free glass lens for a modern design
 - Red retaining ring
 - Also available in Euro and Pencil beams
 - 12V
 - 35W

Mounting

- Upright
- Pendant

Applications

- Off-Road racing
- Extreme terrain
- Long distance night vision

Includes

- 1 Light with Integrated Ballast
- 1 Xenon Capsule
- 1 Stone Shield
- 1 Wiring Harness
- 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

007560771 - Driving Beam

007560761 - Pencil Beam

007560751 - Flood Beam

RALLYE 4000 XENON

XENON

- Features:**
- Robust, black powder-coated metal housing with red accent ring
 - Optimized reflector for more homogenous illumination
 - High-quality tempered glass lens
 - Knurled adjustment knobs for fast lamp adjustment without special tools
 - Generation 3 external mount ballast
 - 12V
 - 35W

Mounting

- Upright

Applications

- Off-Road racing
- Extreme terrain
- Long distance night vision

Includes

- 1 Light
- 1 Xenon Capsule
- 1 Xenon Ballast
- 1 Stone Shield
- 1 Wiring Harness
- 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

007560542 - Euro Beam

RALLYE 4000i COMPACT XENON

XENON

- Features:**
- Internal ballast for the ultimate in mounting flexibility
 - Black powder-coated metal housing
 - Modern design
 - Compact size
 - Red retaining ring
 - 12V
 - 35W

Mounting

- Upright
- Pendant

Applications

- Off-Road racing
- Extreme terrain
- Long distance night vision

Includes

- 1 Light with Integrated Ballast
- 1 Xenon Capsule
- 1 Stone Shield
- 1 Wiring Harness
- 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

009094331 - Driving Beam

009094321 - Pencil Beam

RALLYE 4000 COMPACT XENON

XENON

Features:

- Zinc die-cast metal housing
- 24% smaller than Rallye Xenon
- Modern clear glass design
- Stylish FF reflection
- 4th generation Xenon ballast unit
- Housing, ring, and bracket made of sturdy zinc die-casting
- Knurled knobs for quick lamp adjustments
- 12V
- 34W

Mounting

- Flush

Applications

- Rural, night driving
- Off-road driving
- Off-road racing

Includes

- 1 Light
- 1 Xenon Capsule
- 1 Xenon Ballast
- 1 Wiring Harness
- Mounting Hardware
- Mounting Instructions

Part Number

009094141 - Driving Beam

JUMBO 320 XENON

XENON

Features:

- Innovative clear lens design
- Modern rectangular shape
- Long-range
- Powerful illumination
- Magnesium free-form reflector
- 6 LEDs for position light function
- 12V
- 35W

Mounting

- Upright
- Pendant

Applications

- Large applications
- Extreme terrain

Includes

- 1 Light
- 1 Xenon Capsule
- 1 Xenon Ballast
- 1 Wire Harness
- Mounting Hardware
- Mounting Instructions

Part Number

H12773021

FF 200 XENON KIT

XENON

Features:

- Long-range
- Powerful illumination
- Elegant, innovative clear lens design
- Highly-sophisticated FF reflector
- Fast-fit mounting system for universal attachment
- Also available in singles
- 12V
- 35W

Mounting

- Upright

Applications

- Additional driving light
- Endurance racing
- Motorcycles and sports cars
- Small mounting areas

Includes

- 2 Lights
- 2 Xenon Capsules
- 2 Xenon Ballasts
- 1 Wiring Harness
- 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

007893871

2. Lighting

2.4 Halogen Auxiliary Lights

HELLA 500 SERIES

The art of lighting with innovative free-form reflector technology

The HELLA 500 series of halogen auxiliary lights can be easily installed on the roof or front bumper of a vehicle. They are fully equipped to withstand extreme driving situations. That not only sounds good but looks good too, with a compact design and black casing with matte finish.

In terms of lighting technology, these auxiliary lights offer homogeneous lighting with the help of computer-optimized, free-form reflectors. These lights provide excellent visibility and active safety in all weather conditions.

Part No.	Description	Kit	Single
1 005750952	HELLA 500	■	
2 005750941	HELLA 500FF	■	
3 005750971	HELLA 500 FOG	■	
4 005750512	HELLA 500 AMBER		■
5 005750991	HELLA 500 BLACK MAGIC	■	

Kits Include

- 2 Lights, 2 Stone Shields
- 2 Halogen Bulbs
- 1 Wiring Harness
- 1 Switch, 1 Relay
- Mounting Hardware
- Mounting Instructions

Features:

- Light-weight design
- Impact-resistant reinforced ABS housing
- Aluminum vapor-coated reflector
- Bonded glass lens
- Upright mounting
- 12V, 55W

Single Include

- 1 Light
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

HELLA 1000 BLACK MAGIC

HALOGEN

Features:

- Light-weight Design
- Aluminum vapor-coated reflector
- Impact-resistant reinforced ABS housing
- Innovative Black Optics technology creates unique blackout look when off
- Brilliant white driving beam when on
- Bonded glass lens
- ECE Approved
- 12V
- 55W

Mounting

- Upright

Applications

- Rural, night driving
- Off-road activity

Includes

- 2 Lamps
- 2 Halogen Bulbs
- 1 Wiring Harness
- 1 Switch, 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

004700771

HELLA 700FF KIT

HALOGEN

Features:

- Light-weight design
- Aluminum vapor-coated reflector
- Impact-resistant reinforced ABS housing
- 13% larger than the 500FF Series
- Bonded glass lens
- 12V
- 55W

Mounting

- Upright

Applications

- Rural, night driving
- Off-road activity

Includes

- 2 Lamps, 2 Stone Shields
- 2 Halogen Bulbs
- 1 Wiring Harness
- 1 Switch, 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

010032801

AUXILIARY LIGHT/ WORKLIGHT DISPLAY

Fully powered light display with a memorable design! This display is made of rigid material and can display up to 3 auxiliary lights. With the new HELLA design we guarantee it will be a real eye catcher.

- Stylish design with vinyl graphics
- Made of rigid, lightweight materials
- Lamps included
- Power supply included

HELLA 3 Light Display

The display has the following pre-assembled products:

- A) 500 HELLA Back Magic
- B) HELLA 700F
- C) HELLA 500FF

Part No.

2. Lighting

2.4 Halogen Auxiliary Lights

RALLYE 4000 & RALLYE 4000 FF

HALOGEN

Features:

- Housing Material: Die-cast Zinc
- Optics: Reflector/Lens
- Lens Material: Glass
- Connection: Male Connector
- Mounting Bracket: Die-cast Zinc
- 12V
- 100W (Rallye 4000), 55W (Rallye 4000FF)

Mounting

- Upright

Applications

- Off-road use only
- Rural, night driving

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Pigtail
- Mounting Hardware
- Mounting Instructions

Part Number

H12560021 - Euro Beam

Features:

- Housing Material: Die-cast Zinc
- Optics: Reflector/Lens
- Lens Material: Glass
- Connection: Male Connector
- Mounting Bracket: Die-cast Zinc
- ECE /SAE Approved
- 12V
- 55W

Mounting

- Upright

Applications

- Off-road use only
- Rural, night driving

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

Part Number

H12560001

RALLYE 4000 COMPACT

HALOGEN

Features:

- Housing Material: Die-cast Zinc
- Optics: Reflector/Lens
- Lens Material: Glass
- 24% smaller than Rallye 4000
- Mounting Bracket: Die-cast Zinc
- ECE (Driving beam only)
- 12V
- 55W

Mounting

- Upright

Applications

- Off-road use only

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb (no bulb for -101)
- 1 Stone Shield (no cover for -101)
- Mounting Hardware
- Mounting Instructions

Part Number

009094101 - Pencil Beam

009094181 - Driving

RALLYE 3000 COMPACT

HALOGEN

Features:

- Housing Material: ABS
- Optics: Reflector
- Lens Material: Glass
- 22% smaller than Rallye 4000
- Mounting Bracket: Die-cast Zinc
- ECE Approved
- 12V
- 55W

Mounting

- Upright

Applications

- Off-road use only

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

Part Number

009390011

HELLA 550

HALOGEN

- Features:**
- Light-weight design
 - Impact-resistant reinforced ABS housing
 - Aluminum vapor-coated reflector
 - Bonded glass lens
 - ECE Approved
 - 12V
 - 55W

Mounting

- Upright
- Pendant

Applications

- Off-road use only

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

Kit Includes

- 2 Lamps
- 2 Halogen Bulbs
- 2 Stone Shields
- 1 Wiring Harness
- 1 Switch
- 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

005700301 - Single

005700891 - Kit

HELLA 550 FOG

HALOGEN

- Features:**
- Light-weight design
 - Impact-resistant reinforced ABS housing
 - Aluminum vapor-coated reflector
 - Bonded glass lens
 - ECE /SAE Approved
 - 12V
 - 55W

Mounting

- Upright
- Pendant

Applications

- Off-road use only
- Foggy road conditions

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

Kit Includes

- 2 Lamps
- 2 Halogen Bulbs
- 2 Stone Shields
- 1 Wiring Harness
- 1 Switch
- 1 Relay
- Mounting Hardware
- Mounting Instructions

005700001 - Single

005700901 - Kit

HELLA 550 AMBER FOG

HALOGEN

- Features:**
- Light-weight design
 - Impact-resistant reinforced ABS housing
 - Aluminum vapor-coated reflector
 - Bonded glass lens
 - Amber lens
 - ECE /SAE Approved
 - 12V
 - 55W

Mounting

- Upright
- Pendant

Applications

- Off-road use only
- Foggy road conditions

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware
- Mounting Instructions

Kit Includes

- 2 Lamps
- 2 Halogen Bulbs
- 2 Stone Shields
- 1 Wiring Harness
- 1 Switch
- 1 Relay
- Mounting Hardware
- Mounting Instructions

Part Number

005700021 - Single

005700881 - Kit

JUMBO 220

HALOGEN

- Features:**
- Light Source: H3 12V/55W Bulb
 - Housing Material: ABS
 - Optics: Lens
 - Lens Material: Glass
 - Connection: No Leads
 - Mounting Bracket: Zinc Coated Steel
 - ECE Approved
 - 12V
 - 55W

Mounting

- Upright
- Pendant

Applications

- Off-road use only

Single Light Includes

- 1 Lamp
- 1 Halogen Bulb
- 1 Stone Shield
- Mounting Hardware

OPTILUX WIRE HARNESSES

- Wire harness installation is easy and fast.
- The perfect fit for lamps and OPTILUX LED light bars

ATTENTION: These sets of harness cables are suitable for connecting any spotlight whose energy consumption does not exceed 300W at 12V. Any misuse can be dangerous. Be sure to disconnect the negative terminal (-) of the battery before installation to avoid any short circuit that can lead to injury or property damage.

Single light wire harness includes:

- (1) wire harness connector and fuse ATP * 30 A, (1) relay 12V (1) 12V Switch and Assembly instructions

Two light wire harness includes:

- (1) wire harness with 2 connectors DT * (1) 30 A fuse (1) relay 12V, (1) 12V Switch and assembly instructions

H84131151 Single light harness
H84131141 Two light harness

* Available 1st quarter 2016. Products subject to change without notice. For more information please visit www.myhellalights.com

HELLA BULBS

LIGHTING // Simulations and calculations have been used to support the development of headlights for many years. However, this information alone can not replace the actual impression of lighting as seen in the largest European Light test center in Hella facilities Lippstadt, Germany.

Compliance with Standards World Class

DOT

SAE
INTERNATIONAL®

ARAI
Progress through Research

THE BRAND HELLA IS SYNONYMOUS WITH QUALITY

When it comes to driving safety, sight is the most important sense. Visibility can be impaired under various circumstances and driving under these adverse conditions will increase the risk of an accident. To meet these challenges, HELLA is continually improving existing lighting systems and developing new lighting equipment and components. HELLA bulbs undergo strenuous quality tests. This is achieved by using the most modern equipment in light metering, which provides information if a bulb has the necessary properties.

HELLA products are subjected to the following tests:

Geometrical Measurement

A measuring projector is used to check the filament geometry - with regard to the statutory standards in accordance with IEC 60810. The filament must be dimensioned and positioned within the bulb as specified in the standard. This is the only way to achieve optimum headlight power and prevent glare to oncoming traffic.

Vibration and Shock Test

Here, vibration resistance of the bulb and the filament in particular, is tested on an electrodynamic vibration table.

Paint Adhesion Test

The adhesion of paint on colored glass bulbs - such as the PY21W for example - is tested in a climate chamber at different temperatures and air humidities. Optimum adhesion of glass bulb paint guarantees the prescribed amber indicator light over the whole service life period.

Life Test

Sophisticated tests are used to prove the high reliability of the HELLA bulbs over a long period.

Light Flux Measurement

The Ulbricht sphere and goniometer are used to determine the light fluxes and luminous intensities of the HELLA bulbs. This guarantees optimum light output of the bulbs.

Standard

+50

Long Life

THE RIGHT SOLUTION

STANDARD

HELLA Standard halogen lamps provide original equipment manufacturer quality and a great value for your money.

PERFORMANCE

Our bulbs are setting new benchmarks for halogen lighting and are making driving both safer and more enjoyable. The opaque, silver cap offers an elegant look in clear-glass headlamps

LONG LIFE

HELLA Long Life halogen lamps have a longer service life and are more environmentally friendly, because they do not have to be replaced as often. They provide optimum value for money and the best selection for frequent travelers.

LIFE EXPECTANCY OF A BULB

Service life and light efficiency among other things strongly depends on the supply voltage used. Therefore, protective resistors are used in some vehicle types to ensure that the supply voltage doesn't exceed 13.2 V. On the other hand, undervoltage, e.g. due to a defective generator, means exactly the opposite. The light now has a considerably higher red fraction and thus light efficiency is lower.

Clear Blue

High Performance 2.0

HEAVY DUTY

The double power 24 V produces the light by means of a newly developed, single-wound coil. Bulb power has been able to be increased thanks to this single-coil technology.

The double power brings more safety and light onto the road without dazzling oncoming traffic and reduces costs by increasing service life!

DESIGN

Our Design lamps meet special demands relating to design and safety. The cool xenon effect makes the Blue Light an alternative for design-oriented drivers. In addition, the bluish white light helps improve concentration, providing you with increased driving comfort.

HIGH WATTAGE

The ideal bulbs for professionals who travel off-road, or make special demands on light power. Such as those in agriculture or forestry, or on building sites. In addition, Hella light has been involved in many victories in 24-hour races.

Note: Please note that due to high voltage can generate overheating in the wiring of the headlight.

COLOR TEMPERATURE

Color temperature is a measurement in degrees Kelvin that indicates the hue of a specific type of light source. (Kelvin is indicated by the unit symbol K.) Color temperatures over 4000K are called cool colours (blueish white), while lower colour temperatures (2700 – 3000K) are called warm colors (yellowish white through red). The higher the temperature of a light source is, the greater the proportion of blue and the lower the proportion of red in the color spectrum. An incandescent light bulb has a warm white color temperature of approx. 2700K.

A: Amber glass NA: Natural amber glass

Bulbs "amber glass" have a color tint in his amber glass. Bulbs "amber natural glass" are made of a mixture of minerals that provide the amber in his glass.

Part number nomenclature:

- A: Amber glass
- NA: Natural amber glass
- BL: Blue light
- R: Red glass
- C: Crystal clear (transparent)
- TLL: Long life - two pieces
- P50: 50% more light than standard bulbs HELLA
- HD: Heavy duty
- YL: Yellow light

HIGH PERFORMANCE 2.0

UNDISPUTED PERFORMANCE

HELLA's new HP 2.0 Bulbs have been re-engineered to produce a brighter, whiter light which allows the driver to see more contrast in objects on the road, increasing safety and reaction time. These DOT compliant bulbs have been manufactured under strict HELLA guidelines and are an optimal balance of bulb performance and bulb life. The new HP 2.0 kits contain everything you need to get the job done.

Features:

- More 100% longer life time than standard bulbs*
- Meets global standard (ECE R37 & SAE/DOT and INMETRO regulation).
- Specially designed by halogen mixing gas & filament.
- Color temperature: 3,600 K
- The set includes: Pair of High Performance 2.0 bulbs, Gloves (to protect your bulbs), Silicone Grease (prevents false contacts)

* Compared to standard bulbs HELLA

+50

PERFORMANCE: FOR MORE LIGHT

The HELLA +50 version produces 50 percent more light (compared to standard bulbs*) and extends the light cone, giving performance-oriented drivers additional safety time in case of an emergency situation.

Features:

- More 50% longer life time than standard bulbs*
- Meets global standard (ECE R37 & SAE/DOT and INMETRO regulation).
- Filament design optimized
- Wider and bright light
- OE quality

HIGH WATTAGE

MORE POWER

The ideal bulbs for professionals who travel off-road, or make special demands on light power. Such as those in agriculture or forestry, or on building sites. In addition, HELLA light has been involved in many victories in 24-hour races.

Note: Please note that due to high voltage can generate overheating in the wiring of the headlight.

Features:

- Longer service life
- Environmentally friendly, because they do not have to be replaced as often.
- Excellent luminous efficiency.
- Excellent quality / price

* Compared to standard bulbs HELLA

HEAVY DUTY

FOR HEAVY DUTY VEHICLES - DOUBLE POWER

Durability, resistance to vibrations with 24V power produces excellent light in a single filament. Heavy Duty bulbs offer more power, more safety, without dazzling vehicles.

Thanks to its power and increased lifespan, the replacement costs are reduced drastically.

Features:

- Double power
- 50% fewer spare parts
- 50% less downtime
- 50% less replacement time compared to standard light bulbs

Some examples of the product range:

LONG LIFE

LIFE SPAN: FOR A LONGER LIFE SPAN

The special design of Long Life bulbs for passenger cars guarantees a longer service life, more light performance and reduced energy consumption, making them ideal for frequent drivers and permanent use of daytime running lights. Long Life represents bright but glare-free light. Good performance under extreme conditions encountered by construction machinery or off-road vehicles.

Long Life combines unusual sturdiness and vibration resistance with convincing brightness and long service life.

Features:

- 200% longer life time than standard bulbs.
- Specially designed by mixing halogen gas & filament.
- Meets global standard (ECE R37 & SAE/DOT regulation).
- Color temperature 3,200 K

* Compared to standard bulbs HELLA

MOTORBIKE BULBS

TO SEE AND BE SEEN

For the extensive range of motorcycles, scooters, mopeds, and ATVs, HELLA offers accurate solutions according to the requirements of original equipment.

Particularly because it is important for drivers of two-wheeled vehicles to see and be seen.

Note:

In headlights, particularly in the case of motorcycles or large cylinder capacity engine are commonly found halogen bulbs with identical automotive specifications (such as 60/55 H4, H7 55W, 55W 9006, 9006 HXS 55W, etc.)

Some examples of the product range:

OPTILUX EXTREME YELLOW XY - 12V

The XY Optilux bulbs are designed to give better visibility in extreme weather conditions. Pilots races prefer a yellow light beam, which provides better color contrast in rain and fog situations. The XY Optilux bulbs produce a clear yellow light their filament is made of specific measures to provide the exact amount of light needed in the way.

- All bulbs are Optilux 12V.
- Two bulbs packed in hard plastic.
- For off-road use

WORK LIGHTS

What constitutes a good Work Light?

At the end of the day, more profit to the consumer. After all, Work Lights ensure greater effectiveness, more precise maneuvering, faster reaction and more occupational safety.

How much do good Work Lights cost?

On average, less than a single tank full of gas. For this reason, the advantages easily pay for themselves over many years.

Where can one find optimum Work Lights?

Look no further. HELLA knows the operating conditions place the highest demands on Work Lights. All HELLA Work Lights are therefore tested during development and manufacturing to meet the highest demands in terms of quality so that they can achieve maximum performance. Learn more at...

HYPALUME LED FLOODLIGHT

LED

- Reverse polarity protection
- Transient spike circuit protection
- Over-voltage protection
- Thermal management
- Non-stick and easy to clean surface coating
- High impact grilamid nylon lens
- Heavy Duty cable gland offers bend protection
- RCM compliance
- Premium aluminium housing for mining use
- 5 year warranty

- Light output (measured): 24,000 lumen
- Power requirement: 240 Watt,
- Colour temperature: 5,700° Kelvin
- Multivolt™
- 10 G / 50 G Heavy Duty stainless steel bracket
- IP 6K9K / IP 6K7 (high pressure cleaning resistant / submersible)
- 6ft (1.8m) Double insulated silicone supply cable with pigtail

AC/DC Converter (90-305 VAC)
HLG-320H-24V

- 1 011872011** Extra Wide
- 2 011872021** Close range
- 3 011872031** Long range

RokLUME 380 N

LED

- 7,500 Lumens
- 12 High performance LEDs
- Heavy Duty surrounding bracket
- Strong resistance to vibration
- Hardly any temperature build-up at the lens
- Light temperature = 5000° K
- NanoSafe coating
- Over-voltage protection
- Double insulated silicone supply cable
- Protected against EMC interference
- Approximate LED service life = 16,000 hours (dependant upon the ambient temperature of the LEDs)

NEW

- IP 6K8 (immersible)
- IP 6K9K (dust proof and withstands high pressure wash)
- Connection: DT connector
- 24 V

- Contains:**
- 1 LED Light
 - Instruction manual and Installation components

- 1GA 996 197-001** 24V - Zero Glare
- 1GA 996 197-031** 24V - Pencil Beam
- 1GA 996 197-011** 24V - Close range
- 1GA 996 197-021** 24V - Long range

RokLUME 280 N

LED

- 4,300 Lumens
- Strong resistance to vibration
- Hardly any temperature build-up at the lens
- Light temperature = 5000° K
- NanoSafe coating
- Over-voltage protection
- 8 high performance LEDs
- LED fault bypass
- Protected against EMC interference
- Approximate LED service life = 16,000 hours (dependant upon the ambient temperature of the LEDs)

NEW

- IP 6K8 (immersible)
- IP 6K9K (dust proof and withstands high pressure wash)
- Multi-volt 9-33 V

- Contains:**
- 1 LED Light
 - Instruction manual and Installation components

- 1GA 995 606-541** 9-33V - Zero Glare
- 1GA 995 606-521** 9-33V - Pencil Beam
- 1GA 995 606-501** 9-33V - Close range
- 1GA 995 606-511** 9-33V - Long range

POWER BEAM 1800 LED

LED

- 1850 Lumens
- Polarity reversal protection
- Over-heating protection
- 6 high performance LEDs
- LED fault bypass
- Protected against EMC interference
- Approximate LED service life = 16,000 hours (dependant upon the ambient temperature of the LEDs)

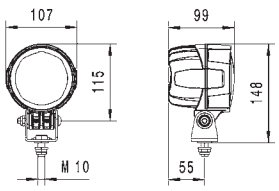

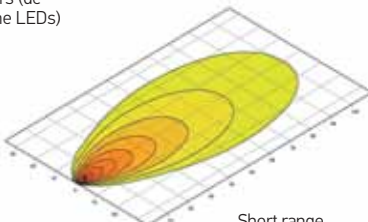

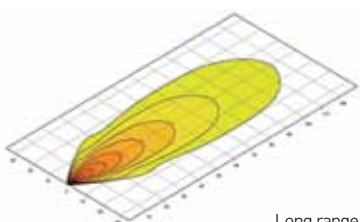

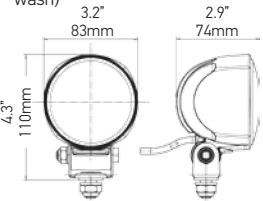

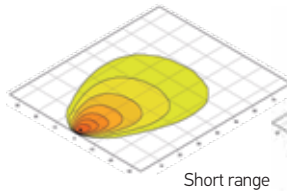

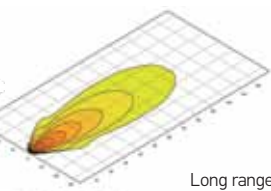

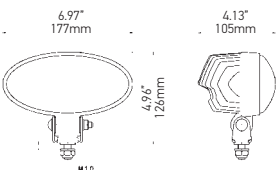

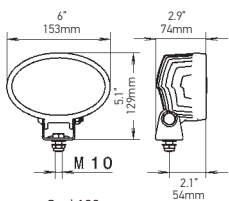

- IP 6K7 (watertight)
- IP 6K9K (dust proof and withstands high pressure wash)
- Housing material: Aluminium
- Lens material: Nylon
- Connection: DT connector
- Power Consumption: 36W

- 996388001** 12V - Close range
- 996388011** 24V - Close range
- 996388021** 12V - Long range
- 996388031** 24V - Long range

HELLA VALUEFIT

HELLA VALUEFIT Series Offers Affordable Lighting Applications and Powerful LED Performance

HELLA VALUEFIT lighting series is a comprehensive line of affordable lighting for a multitude of vehicle applications. HELLA VALUEFIT is designed to meet all of the critical quality requirements for aftermarket lighting, yet is still available without the higher cost of classic premium products. The VALUEFIT line includes a wide range of worklights.

For more information on the HELLA VALUEFIT range of worklights please visit www.hella.com

OPTICAL WARNING SYSTEMS

HELLA's Optical Warning Systems cover a wide range of different models from sophisticated rotating mirror modules to top-quality LED technology. Therefore, the ideal beacon can be chosen for every application purpose. All the beacons and optical warning systems have been tested under the toughest of conditions for continual heavy-duty use. Fleet managers, drivers of commercial vehicles of all kinds and farmers expect

functional security. This means vehicle components built to a high standard and offering a long service life. HELLA beacons, optical warning systems and auxiliary lighting systems fulfill these demands. Their development and production is carried out according to the strictest quality standards. HELLA tests their suitability for everyday life in the most demanding of test series, in the test laboratory and in field tests. Learn more at... www.hellahd.com

K-LED 50

LED

- 12-24 VDC Input Voltage
- 12 user selectable flash patterns
- Flashing and rotating
- Non-volatile memory recalls last flash pattern used at power up
- Multiple units can synchronize and flash simultaneously or alternately
- Reverse polarity protection
- Weatherproof and vibration resistant design for external use
- 5 year warranty
- Light Source: 4 LEDs
- Warning Patterns: 12 Flash Patterns
- Operating Voltage: 11 - 16 VDC
- Max Power: 22 W
- Approvals: SAE J845 Class 1
- Connection Fixed: 16" (40 cm) wire leads
- Connection Magnetic: 10' (3 m) lighter plug with on/off switch
- Multi-Unit Sync: Over 15 units
- Operating Temperature: -30°C to +65°C
- IP Rating: IPX5

3. Horns

S70 Series - High Tone

Part No.	922196011
Voltage	12 V
Frequency	420 Hz
Frequency at 6.5' (2m)	112 dB (A)
Energy Consumption	30W
Approval	ECE
Blade Type	Terminal contacts
Bracket	M8 mounting screw
Housing	Black galvanized metal
Operating temperature	-40° C a 90° C
Special feature	

S90 Series - High Tone

Part No.	922200161
Voltage	12 V
Frequency	420 Hz
Frequency at 6.5' (2m)	113 dB (A)
Energy Consumption	42W
Approval	ECE
Blade Type	Terminal contacts
Bracket	M8 mounting screw
Housing	Black galvanized metal
Operating temperature	-40° C a 90° C
Special feature	

M28 Series - High Tone

Part No.	007425791
Voltage	12 V
Frequency	400 Hz
Frequency at 6.5' (2m)	115 dB (A)
Energy Consumption	72W
Approval	ECE
Blade Type	Terminal contacts
Bracket	M8 mounting screw
Housing	Black galvanized metal
Operating temperature	-40° C a 90° C
Special feature	With surge absorbing diode

S77 Series - Set of Compact Horns

Part No.	011225802
Voltage	12 V
Frequency	350 / 420 Hz
Frequency at 6.5' (2m)	111 dB (A)
Energy Consumption	2 x 48W
Approval	ECE
Blade Type	Terminal contacts
Bracket	M8 mounting screw
Housing	Black galvanized metal
Operating temperature	-40° C a 90° C
Special feature	

1 Piece

M26 Series - High Tone

Part No.	002952811
Voltage	12 V
Frequency	400 Hz
Frequency at 6.5' (2m)	115 dB (A)
Energy Consumption	66W
Approval	ECE
Blade Type	Terminal contacts
Bracket	M8 mounting screw
Housing	Grey black galvanized metal diaphragm
Operating temperature	-40° C a 90° C
Special feature	

1 Piece

B36 Series - Low Tone | High Tone

Part No.	002768082	002768551
Voltage	12 V	12 V

RELAYS AND WIRE HARNESSSES

Relays have been used to remotely control circuits for over 180 years. The technology has proven its reliability millions of times and is today still the first choice for many applications in automotive engineering.

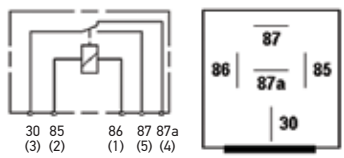

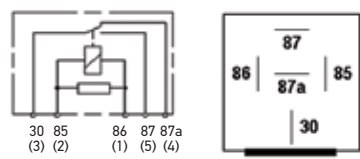

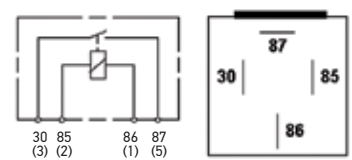

HELLA produces over 100 million units per year at its own facilities - Thanks to optimized production at an attractive price. Large volumes are produced in a fully automated process, small volumes are produced with semi-automation. This means HELLA is able to respond quickly to customer needs and create new variants, in addition to its existing range of short-term products.

HELLA WIPER BLADES

As a leading partner of the best-known European vehicle manufacturers, HELLA has been developing quality components and systems for the automotive industry since 1899, and it is one of the largest providers of vehicle parts and accessories worldwide.

With a wide range of high-quality accessories such as auxiliary lights, horns, lamps and wiper blades, HELLA offers a valuable contribution to road traffic safety!

You can depend on wiper blades from HELLA, regardless of how extreme the conditions are. Our aim is to keep you driving safely.

Our wiper blades are small technical masterpieces. During their service life, they wipe several thousands of litres of water off the windshield. They deal effectively with fog streaks, as well as snow, ice, insects and dirty spray water from vehicles driving in front. They may be small – but their contribution to road traffic safety is considerable. HELLA wiper blades are the must have choice when replacement blades are needed.

We at HELLA recommend that you replace your wiper blades at least once a year.

Premium Quality, Test-Proven

Expect only superior quality from HELLA. HELLA wiper blades are subjected to the highest quality requirements and meet the stringent test standards of Japanese Industrial Standards (JIS) and Society of Automotive Engineers (SAE).

→ Clearer Visibility

→ Longer-lasting Performance

→ HELLA wiper blades perform

- 83% better than Asian Brand A
- 20% better than European Brand A

5. Wiper Blades

Standard Wiper Blades

- 1 The rubber lip is coated with graphite using nano technology and offers even, quiet operation and clear visibility.
- 2 Preinstalled adapter 5 in 1 for easy installation
- 3 Original HELLA logo printed on each wiper blade as a mark of quality
- 4 Superior solid steel frame ensures maximum strength and durability
- 5 Even contact pressure at each contact point provides clean wiping results

Materials

- Natural rubber lip is coated with graphite using nano technology
- Environment friendly and lead-free
- Solid steel frame
- Protective sleeve on each new wiper blade

Universal adapters included

E3
(Pre-installed in all our wiper blades)

B

V9

E

A2-1

Perfect sweep angle 45°, which guarantees maximum grip on the windshield.

The patented flexor prevents the blade stops in one direction allowing a minimum amount of power and energy to the wiper in each applied sweep.

Larger cross section than any wiper blade in the market, responding with maximum efficiency even in torrential rain

Wiper blade arm types supported

Slim masterpieces in black wiper blades are small technical masterpieces in the course of their service life. They wipe thousands of litres of water from the windscreen..

The packaging of the wiper blades provides all necessary information.

- Short number and part number
- Application chart (Brand, model, year)
- Size of the wiper blades in millimeters and inches
- EAN and UPC code
- Descriptions in 4 languages
- QR code link to installation video
- Sticker and mini catalog HELLA

HELLA car wiper blades are available in 13 lengths and come in a practical blister pack.

New packaging with descriptions in 4 languages.

5. Wiper Blades

Rear wiper blades

- 1 Blade made of natural rubber-coated nano-particles of graphite, which greatly improves visibility.
- 2 Universal connectors included designed to fit different types of rear wiper arms. (See right table for adaptor content).
- 3 Original HELLA logo engraved on the structure.
- 4 Pressure points distributed along the wiper blade.
- 5 Special adapter for specific applications.

Materials

- Natural rubber lip is coated with graphite using nano technology
- Resistant frame made of PVC
- Protective sleeve on each new wiper blade

Universal adaptors included

Perfect sweep angle 45°, which guarantees maximum grip on the windshield.

The original design of the new HELLA rear wiper blades facilitates its installation in vehicles that require special connectors/adaptors.

The packaging includes:

- Part number listed on the back.
- Application table (Manufacturer, model, year of manufacture)
- Length of the wiper blade indicated in inches and millimeters
- EAN and UPC bar codes
- Special adaptors
- Descriptions in 4 languages
- Mini catalog
- HELLA sticker

HELLA car wiper blades are available in 4 lengths and come in a practical blister pack.

The rear wiper blades with OE adaptor are available in 2 sizes, in cardboard box.

5. Wiper Blades

Dyna Blade wiper blades

- 1 Embossed logo on the end cap
- 2 Even contact pressure at each contact point provides perfect wiping performance
- 3 Optimum cleaning thanks to graphite-coated wiper blade
- 4 Hinges and exterior metal parts are not needed, guaranteeing trouble-free operation in winter
- 5 Quickfit thanks to 1-to-1 connection.

Dyna Blade HELLA - Features:

- The optimised, pre-contoured spring rail of the flat wiper blades ensures even force distribution at every point across the windshield. This guarantees perfect wiping performance. The even contact pressure avoids wear tips and guarantees clear visibility.
- Wind noise is kept to a minimum thanks to the flow-optimised and noise optimised geometry.
- Perfectly fitting spring rail enables effective wiper performance
- Quality test: High speed test performance at 130km/h.
Corrosion test: 144h SSR (DIN EN ISO 9227), UVA 500h ISO 4892-2 / DIN EN 20105-A02.
- Range: Less part numbers - more applications, 10 sizes
14" - 28" (350 mm - 700 mm)
- 7 adaptadors included for easy installation:

Universal adaptors included

The country of origin changes from USA to China

Dyna Blades from HELLA – the new flat wiper blades.

The optimally contoured vertebrae of the new Dyna Blades provide even distribution of force across every point of the windshield, guaranteeing perfect wiper performance. The even contact pressure prevents wear points developing.

A multi-adapter is preinstalled in all Dyna Blades. That means the new wiper blades can be retrofitted to older vehicles as well. For more recent models, additional adapters for wiper arms are included in the package.

Product range

Size	Part number	Dyna Blade Short code	Presentation

HELLA offers three guarantees with its extensive range of replacement lighting products: best functionality, optimum fit, and lasting customer satisfaction. All replacement parts are made to the same specifications and quality standards as the parts HELLA makes for its OE customers around the world.

ELECTRICS & ELECTRONICS

Up to 30% of the value of a well-equipped new car is down to its electrical and - even more - its electronic systems. That's not a question of fashion, but the result of consumers increasing demands for safety, convenience and infotainment. However, anything installed in a car is liable to fail some day. 52% of all breakdowns are already caused by faulty software or faulty electronics. By 2016 the experts predict the figure will be over 60%. It follows that in future, our business will involve fewer repair to exhaust systems, wheels and gaskets, and more with chips and such. At the same time the need for competent diagnostics, electronic spares and technical services is going through the roof. Enormous demands for wholesalers and workshops, but at the same time a highly lucrative potential for profits and customer loyalty. Seize this potential before others do!

Our sensors - enabling purely smooth running from simple physics: speed sensors, air flow meters, knocking sensors, sensors for boost pressure/manifold pressure, temperature sensors for coolant/oil/air, lambda sensors, level sensors for oil/coolant/washing water, accelerator position and throttle valve position - making modern aggregates out of motors. And as engine wouldn't run smoothly without them, HELLA's perfectly functioning sensors give the engine management system reliably measured values for perfect driving comfort. And as a constant safety indicator: wheel speed sensors (ABS).

Here action follows an impulse. Igniting, closing, opening, tightening, opening up and shutting - this is where our actuators do all the work. Everywhere where precise and constant tension and movement is required in vehicles, HELLA offers the perfect solution: ignition coils, EGR valves, throttle valve supports, positioning elements for central locking, changeover valves. At HELLA movement is routine.

PAGID

BRAKE SYSTEMS

HELLA PAGID BRAKE SYSTEMS

HELLA PAGID offers a fully comprehensive range of brake products and services with excellent solutions and the quality of a strong brand. OE expertise combines with experienced and skilled aftermarket and service capabilities. Our services are comprehensive and always fulfil the high standards that are characteristic of today's automotive market.

Dealers and independent garages trust us because they can rely on us, because we maintain close dialogue with them and understand their requirements, which are fully met by the sophisticated solutions of our range, and because we offer brand quality at a fair price.

WE ASPIRE TO PERFECTION

Over stretches of gravel, on desert sand and through waterlogged ditches, HELLA PAGID products deliver on the promises we make for them. Before they are supplied to wholesalers and garages, all the brake linings are thoroughly tested in our own research and development center. Only this allows us to achieve our aim of perfection and meet our customers' requirement for outstanding quality. We design our tests in line with the vehicle manufacturers' regulations and to comply with standards and requirement specifications which offer optimum safety and comfort.

For example, our brake linings will have undergone testing over 180,000 miles and 1,000 hours before the final quality check. They are not approved for series production until all the quality and safety criteria have been met.

Powerful, tested and reliable – you can be certain of the quality of all our products.

6.3 Hella Pagid Brake Systems

HELLA PAGID BRAKING SYSTEMS

Hella Pagid Brake Systems provide OEM engineered brake technology with extensive professional sales support, leading innovation with first-class technical service and a complete product range with outstanding logistics. As one of the leading Global providers of brake systems in the independent aftermarket, Hella Pagid Brake Systems can look back on decades of experience as an OEM and offer the sales competence of one of the largest trading organizations in the world.

www.hella-pagid.com

“Better Brake Rules” Regulation

To fulfill the requirements of the “Better Brake Rules” regulation, all Hella Pagid friction products to be sold to the U.S. are certified and marked with environmental codes on the product. Today already 60% of our volume is copper free (less than 0.5%) and fulfills level N! This is far ahead of what the rule required (Year 2025).

MORE FROM HELLA

HIGH CARBON ROTORS

HELLA offers three guarantees with its extensive range of replacement lighting products: best functionality, optimum fit, and lasting customer satisfaction. All replacement parts are made to the same specifications and quality standards as the parts HELLA makes for its OE customers around the world. For more information on High Carbon Rotors please visit www.highcarbonrotors.com

BRAKEGUIDE EASILY FIND SUITABLE PRODUCTS

The BrakeGuide, based on TecDoc data and updated weekly, offers garages a wide variety of user-friendly search options. In addition to the usual searches for vehicles and articles found everywhere, this web portal with its expert search processing system allows really flexible research to be carried out by using article criteria. Thanks to the portal's optimised user interface, the BrakeGuide enables customers to identify brake parts from the Hella Pagid range in a targeted, almost intuitive manner. Yet another bonus is the possibility of creating one's very own customized catalog in a printable format. Such catalogs reflect the typical Hella Pagid catalog layout and, after having been tailored to the customer's specific requirements, can then be set up online in their customized version.

BEHR

S E R V I C E

BEHR HELLA SERVICE

Behr and HELLA proudly announced the launch of the North American joint venture for Engine Cooling and Air Conditioning on April 2, 2007, under the brand, Behr Hella Service. Automotive supplier, Behr (specialist for vehicle air conditioning and engine cooling), and HELLA (specialist for components and systems for lighting technology and electronics) together serve the worldwide independent aftermarket for vehicle air conditioning and engine cooling.

The joint venture combines the Behr Service activities for the independent aftermarket and the air conditioning business of the HELLA aftermarket organization. Behr and HELLA each have a 50% share in the joint venture. The combination of HELLA's worldwide sales organization with Behr's product know-how is a natural progression of the already existing cooperation between Behr and HELLA in the field of climate control and front-end modules.

ENGINE COOLING

Engine cooling systems must be quiet, light, efficient, space-saving and reliable - the less they are noticed, the better. The demands made of engine cooling systems are increasing all the time. Nowadays, possibilities of positively influencing fuel consumption, emissions, driving comfort and safety by means of new heat-transfer solutions are more important than ever.

AIR CONDITIONING

For perfect vehicle air conditioning, all Behr Hella Service components and their functions are therefore matched optimally to the comfort demands of car drivers. With the comprehensive system range, you give your customers the best service.

CATALOG OF PRODUCTS

The Behr Hella Service passenger car catalog has over 170 pages in its engine cooling and air conditioning for passenger cars catalog. This catalog contains thermal management parts program for the most popular European passenger car applications.

The catalog includes resistors, engine/transmission oil coolers, compressors, retrofit kits, vacuum elements, pressure switches, PAOOil 68, receiver dryers, expansion valves, condensers, condenser/radiator fans, HVAC blowers, evaporators, Visco®-fans, heater cores, radiators, expansion tanks, and Visco® clutches and more. The new catalog is available in a printed version as well as online.

HELLA GUTMANN SOLUTIONS

We have a passion for technology as well as our customers, which is evident in every diagnostic tool that we develop. Since 1995, the name “mega macs” has stood for intelligent and straight forward support of repair work in garages.

We have an on-going commitment to provide tools that offer fast vehicle identification, reliable vehicle diagnostics, comprehensive supply of data and professional repair support. Regular updates ensure that your diagnostic tool is current through every new tool generation.

With many years of experience and practical support, first-class diagnostic technology and fair pricing models, Hella Gutmann Solutions’ products are the preferred, all-inclusive package for many workshops worldwide.

MEGA MACS PC

The new mega macs PC offers functions such as vehicle identification via the VIN, readout and clearing of fault codes, graphic display of parameters, actuator tests, basic settings, codings, service resets and the automatic storage of vehicle data in the Car History. In connection with the 'Repair Plus light' licence, the PC becomes the all-in-one solution, 'Diagnostics + Data'. This loads the well known Hella Gutmann Data world onto the PC. Component help, inspection data, belt data, technical data, wiring diagrams, fuse and relay etc. are provided right on the screen.

GET FREE TECHNICAL TRAINING

HELLA TECH WORLD

Prepare your automobile garage for the future. At HELLA TECH WORLD you will find all our technical expert knowledge in the fields of lighting, electrical, electronic, thermal management, brake systems and vehicle diagnostics. And best of all this content is available 24/7 for you and your customers for FREE!

Register today and start to acquire the knowledge that will give you a real advantage and competitive edge for greater success!

Visit:

www.hella.com/techworld

KEY FEATURES:

Vehicle-specific Repair Information

We support automotive garages with vehicle-specific diagnostic and repair information related to a variety of fault symptoms – and covering all of HELLA's core competency areas!

Technical Product Information

Prepared by experienced technicians: we have collected our technical information on HELLA products and specific vehicle systems right here for you.

Practical Knowledge

Practical information from the expert: installation instructions, technical brochures, filling capacity manuals, technical videos and much more – expertise for your garage.

HELLA's Online Training

Expand your knowledge with our interactive tutorial. Learn at your own pace about HELLA core fields of expertise.

Technical Literature

To assist you, HELLA has compiled a number of practical manuals containing comprehensive basic know-how and solutions to damage problems, right down to explaining the functionality.

Technical Videos

As assistance or training for your day-to-day work, in these short videos our experts show you in detail all the necessary steps for correctly repairing systems from HELLA's core competency areas.

Know-How Tool

Discover the comprehensive possibilities of our know-how tools – technical expertise combined with realistic 3-D representations.

HELLA AUXILIARY LAMPS

UNDERSTANDING LIGHT

Here is a summary of the most important basic terms in lighting technology and the respective units of measure for bulb and light evaluation.

Luminous flux Φ

Unit: Lumen [lm]

Luminous flux F is the term used to describe the complete light output radiated from a light source.

Luminous intensity I

Unit: Candela [cd]

Part of the luminous flux which radiates in a certain direction.

Illuminance E

Unit: Lux [lx]

Illuminance E specifies the ratio of the impinging luminous flux to the illuminated surface. Illuminance is 1 lx when a luminous flux of 1 lm impinges an area of 1 m².

Luminance L

Unit: Candela per square metre [cd/m²]

Luminance L is the impression of brightness the eye has from a luminous or illuminated surface.

Light output η

Unit: Lumen per Watt [lm/W]

Light output η specifies the rate of efficiency with which the consumed electrical power is transformed into light.

Light sources

Light sources are radiators of temperatures which produce light through heat energy. This means the more strongly a light source is heated up, the higher its luminous intensity will be. The low efficiency (8 % light radiation) only allows a relatively low light output in comparison with gas discharge lamps (28 % light radiation). Recently, LEDs have started to be used as light source in front headlights.

Color Temperature K :

Unit: Kelvin [K]

Color temperature is a measurement in degrees Kelvin that indicates the hue of a specific type of light source. (Kelvin is indicated by the unit symbol K.) Color temperatures over 4000K are called cool colours (blueish white), while lower colour temperatures (2700 – 3000K) are called warm colours (yellowish white through red).

Lumen lm:

The lumen (symbol: lm) is the SI derived unit of luminous flux, a measure of the total "amount" of visible light emitted by a source. Luminous flux differs from power (radiant flux) in that luminous flux measurements reflect the varying sensitivity of the human eye to different wavelengths of light, while radiant flux measurements indicate the total power of all electromagnetic waves emitted, independent of the eye's ability to perceive it. Lumens are related to lux in that one lux is one lumen per square meter.

The lumen is defined in relation to the candela as

$$1 \text{ lm} = 1 \text{ cd} \cdot \text{sr}.$$

Candela cd:

The candela (symbol: cd) is the SI base unit of luminous intensity; that is, luminous power per unit solid angle emitted by a point light source in a particular direction. Luminous intensity is analogous to radiant intensity, but instead of simply adding up the contributions of every wavelength of light in the source's spectrum, the contribution of each wavelength is weighted by the standard luminosity function (a model of the sensitivity of the human eye to different wavelengths)

Bulbs lettering

Vehicle bulbs have to be standardised in compliance with ECE-R37 or R99. This makes bulb replacement possible while at the same time avoiding mix-ups with other bulbs.

- Name of the manufacturer
- 6 or 6 V, 12 or 12 V, 24 or 24 V stands for the nominal voltage in compliance with ECE regulation 37.
- H1, H4, H7, P21 W stands for the international category description of ECE-standardised bulbs e.g. 55 W.
- E1 indicates which country the light source has been tested and approved in. "1" stands for Germany.
- "DOT" means that it is also approved for use on the American market.
- "U" stands for UV-reduced bulbs, according to ECE. The bulbs are used in headlights with plastic cover lenses, for example.
- The approval mark granted by the appropriate authorities e.g. E1 (Federal Department of Motor Vehicles in Flensburg) is inscribed on the bulb and is either 37 R (E1) + a five-digit number or only (E1) + a three-digit number (sometimes alphanumerical codes).
- Most bulbs have a coded manufacturer's mark. This makes traceability to the manufacturer possible.
- Since not all bulbs have enough room for the markings, the legislator prescribes only the following obligatory information: manufacturer, capacity, test mark and approval mark.

Tips for dealing with light sources

- Xenon headlights require high voltage for ignition, which is why the ballast voltage supply plug should always be removed before any work is carried out on the headlights.
- When replacing bulbs, never touch the new glass bulb since fingerprints will be burnt on and make the bulb opaque.
- If a xenon bulb breaks in a closed room (repair shop) the room should be ventilated to prevent a health hazard due to toxic gases. D3 and D4 xenon lamps do not contain mercury and are therefore more environmentally compatible.
- Standard filament and halogen bulbs do not contain any materials which are problematical from an environmental point of view and can be disposed of with normal household waste.

Type approval numbers on the headlight

National and international design and operating regulations apply for the manufacture and testing of vehicle lighting equipment. Special approval marks exist for headlights and can be found on the cover lens or on the housing. The following can be found on a cover lens **HC/R 25 E1 02 A 44457**:

- Code HC/R means: H for Halogen-, C for low beam and R for high beam.
- The slash between C and R means that low beam and high beam cannot be switched on simultaneously (H4 main headlights).
- The subsequent reference number provides information about the luminous intensity of the spotlight.
- The code E1 means that the headlight has been approved in Germany.
- 02 A indicates that there is a clearance light (parking light) (A) in the headlight, the regulations for which have been revised twice (02) since publication.
- The five-digit number at the end is the type approval number which is assigned individually for every headlight design approval.

Help in deciphering the combinations of numbers and letters on headlights

ECE regulation 1

A Clearance light	R High beam
B Fog light	CR High and low beam
C Low beam	C/R High or low beam

ECE regulation 8, 20 (H4 only)

HC Halogen low beam
HC Halogen high and low beam
HC/R Halogen high or low beam

ECE regulation 98

DC Xenon low beam
DR Xenon high beam
DC/R Xenon high or low beam
Simultaneous operation is prohibited.

IP PROTECTION CATEGORY

What does IP protection category mean?

IP stands for International Protection. The IP protection categories are determined according to DIN 40 050, Part 9. The purpose of the standard is the exact definition of electrical vehicle equipment against the penetration of solid materials including dust and against water penetration. The different degrees of protection important for signalling systems are explained below.

Protective category IP 5K4K

Dust may only penetrate to the extent that function and safety are not impaired. Water that is sprayed from every direction at increased pressure against the housing must not have any damaging effect: water pressure approx. 4 bar.

Protection class IP 9K

Water that is directed from high-pressure / steam-cleaning equipment onto the housing must not have any damaging effect: water pressure approx. 80 – 100 bar.

Protection class IP 6K7

Dust must not penetrate. No water may penetrate, even if the device is submersed for some time. HELLA products meet the highest requirements and are ideally protected against all kinds of weather conditions.
